

Tue 16 Oct 2018 0000 UTC

A weather map of Europe and the North Atlantic region. The map features a low-pressure system (cyclone) centered over the North Sea, indicated by concentric blue contour lines. Wind vectors are shown as small arrows in red, green, and purple. The landmasses of Europe, Africa, and parts of Asia are shown in brown, while the oceans are white. The map is titled with the date and time in a blue box at the top left.

Tue 16 Oct 2018 1800 UTC

A weather map of Europe and the North Atlantic region. The map features blue isobars representing pressure systems, with a low-pressure system centered over the North Atlantic and a high-pressure system over the British Isles. Wind vectors are shown as small arrows in red, green, and purple, indicating wind direction and speed. Landmasses are shaded in brown, and the sea level is white. The map is titled with the date and time in a white box at the top left.

Wed 17 Oct 2018 1800 UTC

A weather map of Europe and the Atlantic region. The map features blue isobars representing pressure systems. A prominent low-pressure system is located over the Atlantic, with concentric isobars. High-pressure systems are visible over the British Isles and the Mediterranean. Wind vectors are shown as arrows in various colors (red, green, purple) indicating wind direction and speed. Landmasses are shaded in brown, and water bodies are white.

Fri 19 Oct 2018 1800 UTC

A weather map of the North Atlantic region, including parts of North America, Europe, and Greenland. The map features blue isobars representing pressure systems, with a low-pressure system centered over the western North Atlantic and a high-pressure system over the eastern North Atlantic. Wind vectors are shown as small arrows in various colors (red, green, blue, purple) indicating wind direction and speed. The map also shows the outlines of the continents and islands in brown and white.

Sat 20 Oct 2018 1800 UTC

A weather map of Europe and the Atlantic region. The map features blue contour lines representing pressure systems, with a low-pressure system centered over the British Isles and a high-pressure system over the Azores. Wind vectors are shown as red and green arrows, indicating a strong westerly flow from the Atlantic towards Europe. The landmasses are shaded in brown, and the sea level is white. The map is overlaid with a grid of latitude and longitude lines.

Sun 21 Oct 2018 1800 UTC

A weather map of Europe and the North Atlantic region. The map features a low-pressure system (cyclone) centered over the British Isles, with concentric isobars and a well-defined cold front extending southwestward and a warm front extending northeastward. Wind vectors are shown as arrows, with colors indicating wind speed or direction. The map includes the outlines of Europe, the British Isles, and Iceland. The background is a light tan color, and the isobars are blue lines.

Mon 22 Oct 2018 1800 UTC

A weather map of Europe and the North Atlantic region. The map features a low-pressure system (cyclone) centered over the British Isles, with concentric isobars and wind vectors (arrows) indicating the flow of air. The wind vectors are color-coded, with red and pink arrows showing stronger winds. The map also shows the outlines of Europe, the British Isles, and parts of North America. The background is a light brown color representing land, and white represents snow or ice. The map is overlaid with a grid of latitude and longitude lines.
